

Optimize Energy Efficiency with Advanced Building Automation Systems

If you're seeking to install a new state-of-the-art building automation systems (BAS), upgrade an existing system, or integrate multiple systems to improve efficiency, Systems Commissioning, Inc. (SCI), a Gowan/Garrett, Inc. subsidiary, has experts who can help. With over 25 years of experience, we can plan, design, and install the latest web-based BAS to help you reduce energy consumption and costs, and enhance occupant comfort. We also provide technical assistance, repair/replacement, and preventive maintenance, so your BAS can help conserve resources, cut costs, and increase productivity long-term.

Custom and Scalable Leading-Edge BAS

We specialize in Tridium, Honeywell, and Facility Explorer® non-proprietary BAS that are scalable, secure, and easy to use. Our technicians hold Tridium Niagara® certifications and are experienced in systems integration. Licensed products we support include:

- > Tridium N4 framework
- > Honeywell WEBs platform
- > Johnson Controls Facility Explorer®

Comprehensive Solutions

We provide automated controls for all your building systems including HVAC and chillers, electrical, low-temp, plumbing, refrigeration, access control, and more.

Count on us for:

- > Complete system design and integration
- > Installation
- > Networking
- > Software programming and graphics
- > Commissioning
- > Third-party BAS integration
- > Preventive maintenance
- > Technical support and service
- > New construction and retrofits

Our Advantages

> Flexibility

We offer custom-designed building automation and controls as well as preventive maintenance and monitoring programs tailored to client needs and objectives

> Responsiveness

Our team of highly trained field engineers responds quickly to emergency service calls

> Custom Solutions

We offer customized building automation and controls solutions for virtually all commercial HVAC controls

> Collaboration

We provide owner-assisted design-build systems for clients who prefer to be involved with their building operations

>Advanced Technology

We utilize the latest in sophisticated BAS controls, and integrate them with existing controls systems
